SMART INFRARED THERMOMETER AGU SHE7

measures temperature in 1 second

3 in 1: forehead, ear and objects' temperature readings

saves temperature change statistics in the AGU App

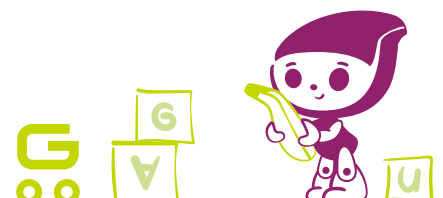

large LCD display with backlight

The **Smart Infrared Thermometer AGU SHE7** makes temperature measuring and result recording very simple and accurate. Results are stored in a unique **AGU App**. The history records are also stored and can be checked and sent to the attending physician. The colour indicator conveniently provides for a quick assessment of the temperature level.

The accuracy of the device is confirmed by certificates ASTM E 1965-98, EN 12470-5, and ISO 80601-2-56.
