THE AGU SMART NATURAL LIGHT LAMP

natural sunlight*

easy awakening

helps to adjust a day regimen

energizes you with sun power

individual lighting and light temperature settings (2200 - 6500K)

* the spectrum is close to the sunlight spectrum in the range 430–650 nm

«Your own sun at home» is a fully controlled lighting system that can imitate sunrise, mid-day brightness and dusk as well. Using the **AGU Smart Natural Light Lamp** ensures an easy wakeup and bedtime regimen for babies, children and adults.

Lamp Sunny AGU creates warm lighting, corresponding to natural sunlight, but without UV. It compensates for lack of sunlight in countries with long winters and it provides normal lighting conditions when the natural sun is too strong and homes often need to be closed off with heavy shields.

Operating independent of the weather and season with a natural night/day regimen and sufficient natural light throughout the daytime, the whole family is provided with energy and inspiration for development and learning.

Lamp Sunny AGU is controlled via the user-friendly **AGU App** and allows the operator to arrange a fully customized lighting regime with their own personal «sunrise» and «dusk».
