Dino

THE AGU INFRARED THERMOMETER

2in1 – forehead & ear measurement

ideal for newborns and kids

gentle and safe

2 years warranty

The **AGU Infrared Thermometer** is designed specifically for fast and accurate body temperature measurement in infants and children. Due to its unique technology, **Thermometer Dino AGU** provides accurate readings of temperature at each measurement; the readings do not depend on external heat.

When pinna measurement mode is on (without a cap), the device can also measure the surface temperature (milk in the bottle, bathing water) and ambient temperature.

Accurate, fast, compact and lightweight thermometer will become your reliable assistant at home and when travelling.
