Daisy

THE AGU NASAL ASPIRATOR

fast efficient
nose cleansing

ideal for infants
and kids

low noise operation

2 years warranty

The **AGU Nasal Aspirator Daisy** is specifically designed to cleanse the nose of an infant or child at home or when traveling. Comfortable and soft aspirator tips (long and short) provide safety and an individual approach to the procedure. The device is easy to handle, compact and comfortable to use and care for.

12 tunes in the memory of the device will interest and distract the baby and make the process of cleansing the nose more comfortable for the child. For your convenience, you can disable the sound of aspirator while the child is sleeping (or at nighttime).

The compact, lightweight and easy-to-use aspirator with children's tunes will become your reliable assistant at home and while travelling.
