gamified AGU App with a guide for proper brushing

dental report after brushing

3 step sonic vibration

The **AGU Smart Toothbrush for Kids** with its unique training application will help you teach your children to correctly brush their teeth all by themselves. A fun-loving character and an entertaining story make learning entertaining and inspiring, while the handy and comfortable child-friendly shape of the toothbrush makes it easy. Parents can control the results by receiving reports on the quality of brushing. Motivational program is designed for 2 months when a stable skill is formed. Several profiles can be connected to the application, thus, quality reports about the brushing can be received from each child.

The device is controlled by one button; a soft antibacterial brush can operate in three modes of brushing.

By using the **AGU Toothbrush Brushy**, teaching children how to brush their teeth correctly is easy and entertaining.
