

Mr.Securio

THE AGU SMART GPS WATCH FOR KIDS

integrated phone function

the accuracy of location determining up to 1 m

interchangeable straps

This device provides information on your child's location within 1 m accuracy and it operates with both GPS and GLONASS systems. Parents can create a safety radius and they will receive an instant message once if the child leaves it as well as whenever the child is taking off the watch.

The movement history is stored in the **GPS Watch Mr.Securio AGU** as well as in the user-friendly **AGU App**.

Parents can always communicate with their child even when they are not next to each other. With **GPS Watch Mr.Securio AGU** you can send written or audio messages as timely reminders or to encourage your child throughout their day!
