## THE AGU SMART BABY FORMULA MAKER

baby formula mixing  
in 4-25 seconds

keeps water clean

**Häppi Shaker AGU** is designed to make every parent's life as convenient as possible. At the same time, it assures the correct preparation of your baby's formula in the case that breastfeeding is not an option.

With only one click via the user-friendly **AGU App** the baby formula is prepared to the right temperature and strictly according to the precise recommendations of the baby formula manufacturer. The **AGU App** uses a wide range of baby formulas from different manufacturers. The short preparation time facilitates feedings to be as close as possible to feeding on demand.

Just fill in the baby data form, scan the QR-code of the baby formula, and the **AGU App** will identify all necessary parameters automatically. The feeding history is stored in the **AGU App** as well.

\* SMART BABY FORMULA maker AGU is only compatible with formulas with high flowability and looseness. See the list of formulas on the site.

**YOUR BABY WON'T NOTICE ANY DIFFERENCE, BUT YOU CERTAINLY WILL.**
