NON-CONTACT THERMOMETER AGU NC8C

contactless

measurement in 3 seconds

guaranteed accuracy up to 5 cm

color and sound indication

With the **AGU NC8C** thermometer, you can measure temperature as quickly and easily as possible. You need to press just one button, and the thermometer will display the temperature reading in 3 seconds. This procedure will not cause discomfort to your baby and will make temperature measurement easier.

The distance indicator light allows you to measure the temperature on the forehead at a distance of up to 5 cm. You no longer have to wake your baby or interrupt your play together. The unique design of the device with a built-in German infrared sensor provides accurate and reliable measurement results (+/- 0.2 °C).
